

SUMMARY OF SERVICES FOR BRAND PHARMACEUTICAL MANUFACTURERS

A. Product Lifecycle Management - Prescription Analytics serves as your partner throughout the entire pre-launch and post-launch processes to ensure the successful launch and management of your product or product line. Services include, but are not limited to:

- Launch planning and project management
- Contract and pricing analytics
- Partner/resource assessment and coordination
- Pharma Data Compendia and government new product reporting and submissions
- Product/patient access support
- Product retirement

B. Pharmaceutical Licensing Support Services - Prescription Analytics supports and manages the process of securing entity appropriate federal, state and territorial level licenses driven by specific client objectives. Services include but are not limited to the following:

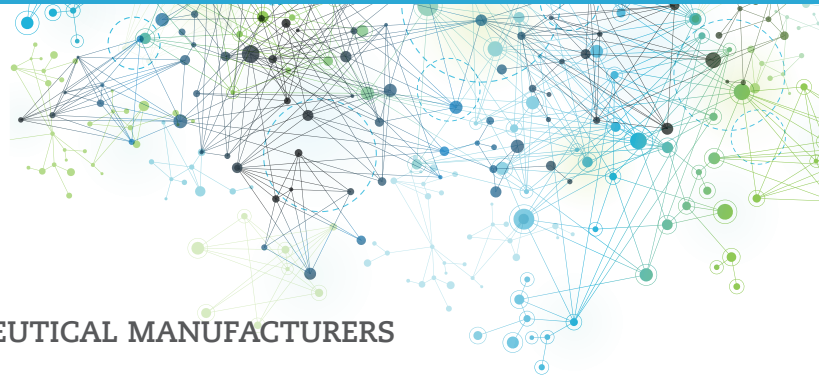

- Create tailored implementation plan
- Facilitate master licensing questionnaire
- Initial license applications (Federal, State & Territorial)
- License updates and renewals
- Ad Hoc licensing support services

C. Market Access, Contracting Support and Pricing Strategy - Prescription Analytics serves as a virtual analytics department supporting market access initiatives, sales administration, contracting, product planning and rebate forecasting activities. Services include but are not limited to the following:

- Pricing and contracting support
- Scenario forecasting and rebate liability impact analysis
- Sales reporting
- Market analysis
- Supply chain management
- Procedure development and management

- SOP for government reporting and pricing computations
- Class of Trade assignment and policy document
- Complete and submit required government program applications approved by client
- Completion of all government required pricing computations and submissions to appropriate federal and state regulatory authorities
- Healthcare reform updates, as well as any other regulatory changes relevant to pharmaceutical government contracting
- Dispute resolution
- Securely archive all historical datasets
- Medicaid drug rebate program services
- Public health service/340B program services
- VA Federal supply schedule & national award contracting

SUMMARY OF SERVICES FOR BRAND PHARMACEUTICAL MANUFACTURERS

- Tricare program rebate processing services
- Medicaid Part D coverage gap discount program services
- Medicaid Part B - physician administered products
- ACA branded product tax support services

E. PBM, Managed Care and Trade Contract Management, Rebate and Discount Reconciliation - Prescription Analytics takes on the responsibility for building your library of commercial contract terms and then reconciles invoices for rebates and discounts as they are submitted by commercial customers. Services include:

- Develop and maintain policies and SOPs at program and contract levels as required
- Create, accept and store contract master profile data used for validation
- Manage connectivity and data exchange through program web portals or receipt of data media as required
- Data decryption and cleanup
- Create client rebate reconciliation and payment report for approval/payment
- Provide client analytics and customized reporting using all stored data characteristics

F. State Price Transparency Reporting and Financial Disclosures - Prescription Analytics provides support for complying with state level price reporting requirements. Services include:

- Track state price reporting requirements
- Integrate with client product pricing team
- Provide required impact analytics related to contemplated pricing and price adjustments
- Prepare and submit required notifications to state regulatory authorities

G. Chargeback Processing Services - Provides services and support necessary for timely and accurate processing for brand clients with low volumes of pharmaceutical chargebacks including:

- Continuous customer and contract setup and maintenance
- Processing and verification of all submitted line items
 - Contract, terms, products, prices
- Account maintenance and membership eligibility as required
- Assign Class of Trade
- Issue resolution with trading partners
- Oversight and reporting by specific contract upon request

**Note - This service is limited to brand clients with monthly chargeback loads of less than 2500-line items per month. Larger volumes justify the cost of implementing a robust chargeback processing system and/or service for which PAI will support the evaluation and transition of services.*

H. Ad Hoc Analytics, Forecasting and Pharmaceutical Support Services - Prescription Analytics provides additional services on request including, but not limited to:

- Custom reporting, analytics and forecasting projects
- Audits and restatements of government pricing values (Prior to PAI)
- Rebate liability impact analysis
- Build and correct Medicaid rebate historic database if required
- Pharmaceutical data compendia submissions
- Other ad hoc analytic projects on request
